Press Release: VA T-4 Services Oriented Architecture (SOA) Task Order Contract

On February 28, 2012 ASM Research, winner of the VA T-4 Services Oriented Architecture (SOA) Suite task order contract, was notified by a VA T-4 contracting officer that the VA was terminating this contract for the convenience of the Government.

This decision was based on the findings of an investigation by the Government into an alleged Organizational Conflict of Interest (OCI) focused on the involvement of individuals from a subcontractor company on the ASM Research team.

Jeri Lassiter, Chief Executive Officer of ASM Research, stated, "ASM Research was aware of this investigation from the start and was fully responsive to all requests for information received from the Government throughout the process. For over 33 years we have always demanded and maintained the highest levels of integrity and ethics from our staff and teaming partners as a responsibility of a trusted partner of the Federal Government and we will continue to do so.

Teaming is a vital element of industry's ability to provide best value solutions to achieve Government requirements. Prime contractors are dependent upon the representations made by their potential teaming partners."

John Fraser, President and Chief Operating Officer of ASM Research, commented further, stating "we commend the VA's handling of this matter, and we take the findings of the Government and our responsibilities related to potential OCI issues seriously. We remain committed to the very highest standards of ethical behavior and procurement integrity, and we look forward to continuing our relationship with the VA and furthering our company's track record of exceptional support to the VA under both the T-4 contract and otherwise."

Established in 1979, ASM Research Inc. is an employee-owned, mid-size company committed to providing extraordinary service to our local, State, and Federal Government customers. For more information about ASM, visit the company website at www.asmr.com.
